The prophets have always taught that we are all One. Why has this most simple and important truth gone unheeded? The world is in political, religious, economic, and ecological crises of our own making. We need a mass spiritual awakening, in which billions truly realize that we are One. This would transform our world: children wouldn't starve, women wouldn't be brutalized, and young men wouldn't die in battle. But could such an awakening ever take place? Could we actively promote it? Yes. There is a way.

Eastern traditions say that the energy called "Ki" is the common bond directly connecting body, mind, and spirit. For hundreds of years, martial artists have taught students to use the flow of Ki to strengthen the physical body. Now, in *Healing Society*, Dr. Seung Heun Lee shows how we can use this energy to strengthen our spiritual bodies, to actually experience a direct connection to the ultimate oneness, feeling it with every fiber of our being, knowing it to be the deepest truth. He teaches that this noble enlightenment is meant for everyone, and that by getting into contact with it, we may illuminate the world and liberate our children's future.
