This is the story of a boy lost without a girl he has loved across five universes. Finding Me introduced Chloe Carmichael and her inability to recall her past lives, including her love for Christopher Thomas.

Finding Her is a novella from the perspective of Chris set right before he meets Chloe for the first time on Earth. Christopher Thomas is on a journey. He has searched for years for the love of his life, Amanda Graves.

He's on a race to find her before their mutual enemy, The ENO. Because if the ENO captures her first, everything will be lost: love, life, and everyone in the known universe.
