Two outsiders with mundane jobs decide to embark on a campaign of vigilantism to add meaning to their fruit lives. Stevie and the mercurial Dave soon realize they have the power to start a revolution... But as Stevie's love interest seems to be slipping away and his day job threatens to turn him into a 'company man', Dave quickly escalates 'The Operations' with the establishment in his sights. It's never enough for Dave; he's out of control and power is going to his head... he won't stop until he has revenge on the world... Movement is a story ideal for fans of Irvine Welsh, Mr. Robot, Bret Easton Ellis and Chuck Palahniuk, through to Office Space.
