Hunter already has enough horrors in his head after suffering years of combat in the Airborne Infantry. But nothing he's seen can prepare him for what he's about to encounter. A soldier with more than ten years of experience, Hunter will put his training to the test when he confronts the undead. After seeing a gruesome zombie attack on TV, he quickly discovers that the danger lurks right outside his front door. He must swing into action in a hurry if he doesn't want to be dinner.

That isn't all. His wife and son are trapped in Washington, DC, and their survival depends on his ability to defeat the enemy and reach the nation's capital. Time is of the essence as a mysterious group of subterranean creatures unleashes the virus in order to take over the surface. But it will take more than swinging a combat knife and a sword to win this battle. Are his skills up to the test? Find out in *Swordsman Apocalypse*, a military science fiction novel by author Shawn M. Scott, who applies his own combat experience to a simple question: how would a real soldier stack up against a plague of zombies?
