Dream Agency Series: How does a Djinn with a need to feed on human emotions survive in the modern world? Only emotions produced as a result of his own actions are suitable sustenance, but granting wishes in public has been backfiring on his kind for centuries. The answer is to hide his nature under a scientific guise, after all its amazing what hypnosis can accomplish. Physical Therapy People just don't come to the Dream Agency to have their fantasies fulfilled. Sometimes their techniques are able to heal damaged minds, that is, if you're willing to pay the price of treatment. Waking to find yourself naked in a cage, obviously in someone's barbarian dominance fantasy, is not Delta's idea of fun, especially without the usual hypnotic personality change to fit her role. To her knowledge the agency was infallible, so what was the purpose of this scenario? Is his controlling dominance for her benefit, or her urge to resist for his? This book contains adult themes and is intended for a mature audience only
