The enchanted islands of the Galapagos come to life in this breathtaking 3-D exploration of one of the most popular ecological travel destinations in the world. Hammerhead sharks, penguins, giant tortoises, dolphins, marine iguanas, and rays are among the amazing variety of creatures presented in up-close stereo photos, on land and underwater, along with stunning shots of the islands' most beautiful landscapes. Sturdy 3-D lenses bound into the front cover, informative captions, a map, and a helpful glossary of terms make Galapagos in 3-D a fun and fascinating look at the islands and wildlife studied by Darwin, taught in schools, and beloved by natural science enthusiasts of all ages.
