Hot new release! Premiere science fiction from the mind of Top 20 Amazon seller Ryan Schneider, award-winning author of The Go-Kids series. Imagine a world in which air pollution is a thing of the past, cheap renewable energy is commonplace, and robotics is a daily reality as ubiquitous as mobile phones are to us today. In the future people still go to work and to the gym and to the sports bar to watch Monday Night Football. They still take the kids to school and pick them up in the afternoon and have to figure out what's for dinner. And they still fall in love and dream of living happily ever after. Eye Candy is a story about all this and more. It is a story about what it means to be a human being, with characters so real you feel like you know them. In this near-future Los Angeles, roboticist Danny Olivaw finds himself on a blind date with a beautiful robopsychologist named Candy. But the next day, strange things begin to happen. Little do they know what fate has in store for them.

Brilliantly conceived and executed with delicate precision, Eye Candy is a complex, endearing tale for mature readers that's as fast-paced and uplifting as it is fun.
