The Cat Fanciers' Association Complete Cat Book provides both breeders and pet owners with an easy, authoritative, and engaging reference book on their beloved pet. Written by the associates of the CFA -- consummate experts in their field -- and edited by Mordecai Siegal, this compendium offers a thoroughly instructive and wholly entertaining resource by providing all the information necessary for knowing everything about the feline. All forty-one breeds officially recognized by the CFA are here; detailed descriptions and official standards outline their history, physical features, and personality, and include show grooming requirements and special handling tips, whether you're at home or in the ring. In addition, you'll find a lively illustrated history of the CFA, the world's largest and most prestigious registry of pedigreed cats. The book also includes a home veterinary guide as well as in-depth information on cat selection, grooming, behavior, and other essential topics. A major section is devoted to feline nutrition, as energy and nutrition requirements vary during the different stages of a cat's life. CFA veterinary experts offer advice from choosing the right cat food to keeping your beloved feline healthy and fit.

The Cat Fanciers' Association Complete Cat Book promises to become the standard reference in every cat lover's home.
