After nearly losing his leg to sniper fire, Kyle Fagan knows his days as a special ops operative are over. All he wants to do now is hold up in his house and ignore the rest of the world. But ignoring Dr. Farrah Hastings is something Kyle is finding difficult to do. Especially since being alone with the good doctor might just be the medicine he needs. Farrah can't stand the thought of Kyle giving up on life. When her warm affection for him ignites into something much hotter after just one kiss, she finally understands why.

Now nothing will stand in her way of prying Kyle out of his depression, not a forest fire, not an escaped criminal, not even Kyle himself.
