Note: The book has all the contents both in German AND in English. Jarno Saarinen ist eine Legende, und war es schon zu seinen Lebzeiten. Dafür gibt es verschiedene Gründe: Wie Mike Hailwood, Giacomo Agostini und Phil Read zählte Jarno Saarinen zu seiner Zeit zu den Grössten seines Sports. Als Mensch war er enorm beliebt, ebenso seine Freundin und spätere Ehefrau Soili. Er hatte grosses technisches Verständnis, war intelligent und hatte eine professionelle Einstellung. Und weil er bei einem tragischen, vermeidbaren Unfall tödlich verunglückte, werden ihn seine Fans nie vergessen. Jarno Saarinen is a legend. He was a legend during life already and there are several reasons for it. As a rider he was one of the greats of his time, like Hailwood, Agostini and Read. As a man he was immensely popular, like his girl-friend and latter wife Soili. As a technician he was very gifted. And he was intelligent and very professional. Finally, the fact that he was killed in a tragic and unnecessary accident makes fans remember and admire him forever. Jarno's Grand Prix-career was far too short, only 3,5 years. Most enthusiasts only know him from that period: his hard riding style, the fact that he maintained his bikes himself and that he was always faithful and loyal to Yamaha.

But most of them don't know he has raced on 125 and 250cc Puchs in his home-country during 7 years; on the road, on ice, on sandroads, in enduros etc. That's why this book intends to show, in many pictures and in text, who Jarno Saarinen really was. As a man, as a rider and as a favorite.
